  interaction_genotype_x_age/
  interaction_genotype_x_age.py
2 Genotype x Age interaction model with per-gene
  classification
3
4 Combined 17 samples x 27692 shared genes
5 Design cells:
6 genotype    age
7 WT          3mo      5
8             18mo     5
9 MUT         18mo     4
10            3mo      3
11
12 Genes after filter: 21008
13
14 Significant interaction genes (q<0.05): 4395
15
16 Affected by:
17 affected_by
18 age_only      8837
19 both          6251
20 neither       5256
21 genotype_only  664
22
23 Interaction pattern (how the genotype effect
  changes with age):
24 interaction_pattern
25 no_genotype_effect      14093
26 age_dependent_onset     6906
27 transient_early         7
28 reversal                2
29
30 Genes up with age in MUT but down with age in WT (
  sig interaction): 729
31
32 Saved: interaction_genotype_x_age_results.csv,
  interaction_gene_classification.csv,
  interaction_category_summary.csv, and three figures
